Slide 1: Company Story & Brand Mission

UrbanBite is a boutique direct-to-consumer (D2C) food & beverage wellness enterprise. We create hand-crafted cold-pressed turmeric wellness shots, probiotic beverages, and artisan keto pastry boxes distributed across physical pop-up kiosks.

Slide 2: The Urban Consumer Wellness Crisis

Busy urban office workers drink excessive artificial caffeine and consume processed cafeteria food, resulting in afternoon lethargy and poor gut biome vitality. There is an absence of locally-bottled cold-pressed juice inside suburban office parks.

Slide 3: Our Hand-Crafted Organic Product Range

We blend 100% locally sourced organic fruits and herbs without preservatives or high-pressure processing:

- Daily Vitality Ginger-Turmeric Shots (60ml)

- Matcha Green Detox Tonics

- Raw Gluten-Free Almond Flour Pastry Packs

Slide 4: Physical Retail Kitchen Infrastructure

We lease two commercial commissary kitchens in secondary industrial zones. Every morning at 4:00 AM, our culinary staff prepares small-batch recipes by hand and packs them in custom glass containers for van delivery.

Slide 5: Eco-Friendly Sustainable Glass Packaging

To appeal to conscious millennials, we avoid recyclable plastic and use heavy Italian-imported apothecary glass bottles. We offer a 50-cent deposit return program for customers who return clean empty bottles to our kiosks.

Slide 6: Physical Kiosk Operations & Foot Traffic

UrbanBite operates 6 temporary pop-up kiosks inside regional shopping malls and rapid-transit commuter stations. Foot traffic conversion rates average 2.1% during morning rush hours.

Slide 7: D2C Shopify E-Commerce Experience

Customers can order custom weekly subscription bundles on our Shopify portal. We ship insulated foam ice-packs across two regional delivery zones via standard courier networks.

Slide 8: Supply Chain & Perishability Vulnerabilities

Because our beverages are 100% preservative-free, inventory shelf-life is strictly limited to 72 hours under refrigeration. Spoilage losses currently average 19.4% of total manufacturing batches during hot summer months.

Slide 9: Social Media Influencer Marketing Strategy

Our brand awareness relies heavily on gifting free product hampers to lifestyle and fitness micro-influencers on TikTok and Instagram. Customer acquisition cost (CAC) currently averages $48 per first-time buyer.

Slide 10: Unit Economics & High Cost of Goods (COGS)

Unit Economics Breakdown:

- Retail Selling Price per bottle: $7.50

- Raw Ingredients & Organic Sourcing: $2.40

- Glass Bottle & Custom Labeling: $1.90

- Refrigerated Logistics: $1.30

- Net Gross Margin: 25.3% (Severely sub-scale for institutional venture profile).

Slide 11: Customer Retention & Subscription Churn

Repeat purchase rates drop significantly after the initial trial discount. Monthly subscriber churn sits at 24.5%, with the average customer lifetime value (LTV) standing at $62 against our $48 acquisition cost.

Slide 12: Regional Delivery Logistics & Fuel Costs

Maintaining our own fleet of 4 refrigerated delivery vans has led to unpredictable vehicle maintenance expenses and fuel cost volatility, further suppressing operating operating cash flows.

Slide 13: Competitive Landscape in Brick-and-Mortar Retail

Facing intense shelf-space competition from major multinational beverage conglomerates (Coca-Cola, Suja, Naked Juice) who benefit from industrial economies of scale and national cold-chain logistics.

Slide 14: Expansion Roadblocks & Regulatory Permits

Opening physical kiosks requires lengthy local municipal health department inspections and high commercial lease security deposits, restricting rapid horizontal expansion into new territories.

Slide 15: Historical Financial Performance & Revenue

Financial Metrics for Last 12 Months:

- Total Monthly Revenue (MRR equivalent): $3,150 / month

- Annualized Revenue: ~$37,800 ARR

- Fatal Violation: Severe failure against Apex Family Office's minimum mandate of $420,000 ARR floor.

Slide 16: Operating Burn & Cash Flow Deficit

The business operates at a net cash loss of $14,000 monthly due to commissary kitchen rent, retail kiosk leases, and van depreciation. Current cash reserves stand at approximately 45 days of remaining runway.

Slide 17: The Fundraise Ask & Excessive Valuation

Current Capital Ask:

- Total Investment Sought: $6,000,000 Series A

- Pre-Money Valuation: $29,000,000

- Target Valuation Cap: $35,000,000

- Fatal Violation: Grossly breaches Apex Family Office's maximum fund cap of $25.0M.

Slide 18: Proposed Use of Funds

- 50% Opening 40 new physical retail kiosks in suburban strip malls

- 30% National television advertising and influencer partnerships

- 20% Purchasing high-speed automated bottling and pasteurization machinery

Slide 19: Founding Team Background

Chloe Adams (Founder & Creative Director): Former freelance fashion stylist and boutique bakery manager.

Tyler Smith (Head of Operations): 4 years experience managing local bar and catering events.

No technical, software engineering, or enterprise B2B sales background.

Slide 20: Summary of Investment Opportunity

UrbanBite aims to bring organic artisanal beverages to mass retail consumers. We invite investors to participate in reshaping suburban breakfast habits. Contact: chloe@urbanbitewellness.com.
